產品說明

貼合後產生的內裏布發霉情況，由於使用白乳膠貼合，白乳膠的天然成分容易導致霉菌繁殖，一旦發霉情況產生，容易形成霉斑導致無法清除而造成材料報廢，建議要求貼合時在白乳膠裏加入 2%~5% (季節區分用量) 的防霉貼合劑做好預防措施，並且攪拌均勻使用。

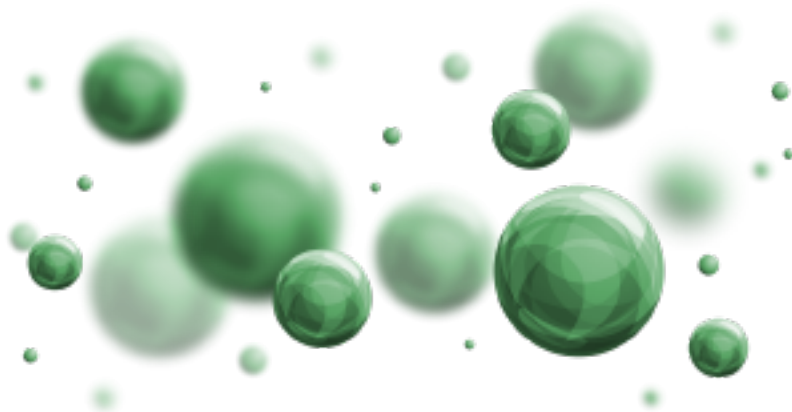

IM-8201-1 膠黏專用防霉添加劑

ANTI -MOLD AGENT FOR ADHESIVE

20公斤/桶裝

IM-8201-1 ANTI-MOLD AGENT FOR ADHESIVE

PRODUCT INSTRUCTIONS:

Here is the mildewed condition in lining after the coating. It's coated by the natural glue, and natural substance of glue is easy to cause the breeding of mildew. As long as it causes the mildewed situation, it will form the mildew and lead material to be scraped eventually. Therefore, we suggest to put 2%-5% (usage depends by seasonal) amount of this agent into the natural glue (latex), and mix evenly, to be preventive measures as well.
